Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. This application has been examined. Claims 1-9 are pending in this application.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hass et al. (USPN 5,035,657).

As per claims 1-3, Hass discloses in figs. 1, 10-12, the invention substantially as claimed, comprising: a coaxial cable connection for connecting cables into one connection which can be connected into signal cable, the connection comprising: covering clamp (17,19) for fitting over the two connecting cables; a sheath (69) covering and clamping the two cable together adjacent to said covering clamp; and a substantially tubular connector (71,91) for connecting over said covering clamp (17,19) and adjacent to said sheath wherein the covering clamp, said sheath, and said substantially tubular connector form two-to-one cable connection so that a single cable carrying signal can be connected to the substantially tubular connector and convey signal into the two cables via said covering clamp.

Claims 5-9 recite method steps substantially corresponding to the connector claims 1-3; therefore, they are rejected under the similar rationale.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hass.

As per claim 4, Hass does not explicitly disclose that the clamp for receiving one RG 58 cable or two RG 179 cables. Official notice is taken that the use of such cable is well known in the art. Therefore, it would have been obvious to one skilled artisan in the art at the time the invention was made to substitute Hass's coaxial cable with the well-known type RG 58 cable because they both perform the equivalent function of carrying signals from one connector to another connector.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xuong M. Chung-Trans whose telephone number is (571) 272-2002. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on (571) 272-2800 extension 33.. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
